No problem, Kyle. Kristy is great to work with.

Hey Kyle,

Sorry for just getting back to you on this. I believe Kristy Richardson (copied), the State Toxicologist, and her team will be able to help you with this. She was involved with some of the backend work regarding our Terumo outreach in 2018 and is familiar with the issue.

Hi Jeremy-

Really sorry to bother you about this but it looks like the EPA is moving pretty quickly on EtO outreach again. We talked with Jason Long about the technical aspects of Terumo, but I was wondering if you could possibly point me to the person at CDPHE who might be able to work with us on the outreach/toxicology/risk portion this EtO work? Sorry to be fishing for contacts, it seems we're picking up where we left off in 2018 and the players have changed in quite a few cases.

Thank you for your help,

Kyle Olson

Hi Kyle,

I'm not sure if I'm the best person to talk to about this at this point. I am now the director of environmental boards and commissions at the department, and I don't have access to those files anymore. I think pulling Jason Long into the conversation makes the most sense, and he may have others in permitting that he'd like to join him. Please let me know if you need contact information for anyone.

Hi Jeremy,

My colleague Kerry Hicks and I here in the Region 8 office are going over the latest Air Toxics National Emissions Inventory data and wanted to run the 2017 risk data by you. Our HQ office wants to make sure it's verified by the end of the month. There isn't a lot to cover, we just want to confirm that it's all set. Would you have time for a quick meeting sometime later this week? Is there anybody else at the State that we ought to invite to the meeting to go over the data?

Thanks,

Kyle Olson
